

Hello,

I am Alison Stehlik and I teach Industrial Arts at Luther L Wright. I teach Adv. Woodworking, Industrial Technology I and II, and Vocational Manufacturing for 7th and 8th grade. I feel very fortunate to be able to teach kids how to do the thing that I love to do most; make things!

Although I was born and raised in Gogebic County, I have been away from home for nearly 15 years, teaching woodworking, metal fabrication, and metal casting in the area of Art and Design at the University of Wisconsin Green Bay, the University of Kansas, and Penn State University. I am very happy to be 'home' again in the community that I love with my parents, my husband, and my two daughters.

Students in my classes learn construction techniques, drafting principles, an appreciation for quality artisanship, as well as how to follow a sequence of steps to design, problem solve, and build. Ultimately, it is my goal as a teacher to show kids that the process of building something can be a pathway to discovery. I hope to empower my students with a creative spirit the ability to make things for themselves.
