

Hello everyone! I have been teaching Mathematics in Ironwood since 2010. I am currently teaching Math 7, Algebra 1, Algebra 2 and AP Calculus.

I went to elementary, middle and high school in Bessemer. I went to two years of college at Finlandia University, where I played volleyball and studied elementary education. I then transferred to Western Michigan University and switched majors to Secondary Education. Math always came easy for me, and I loved teaching and helping others. So, becoming a teacher was a perfect fit for me!

I was lucky to land my first teaching job right back home close to my family and friends. I was hired as the head coach of the volleyball team, and I have been coaching varsity volleyball since the beginning of my teaching career. I love coaching and getting to know my students in a different setting.

In my spare time, I enjoy the outdoors. I love playing and watching all sports. I am a huge Milwaukee Brewers fan! It is my husbands and my lifelong goal to get to every MLB stadium. We are already well on our way!
