

Hello, I'm Paul Mattson. I teach science here at L.L.Wright for students in grades 7 through 12. I've taught in Ironwood for 23 years after teaching one year in Oshkosh, Wi. I have degrees in Science, Biology, Physics, and Math, along with a Master's degree in education.

My many interests include hunting, fishing, motorsports, travel, and spending time with my family.

I believe that all students need to be given the skills to make them successful. This means giving students extra help when they need it, but also pushing the highest performing students to reach excellence.
